

Taylor Juniper

The Facts

Height: 30'
Spread: 3'
Sun: Full sun
Water: Medium
Soil: Well-drained
Growth Rate: Moderate

Taylor Junipers, similarly to Spartans, are coveted for their low maintenance and narrow growth habit. Semi-soft, blue-green foliage and narrow columnar form provides a refined, elegant look. This handsome selection maintains a more dense, upright form than other similar plants.

'Taylor' is an upright narrow columnar eastern red cedar. Silvery blue-green foliage is attractive throughout the growing season. Foliage may take on some bronze tones in winter. Round, blue-purple, berry-like cones on female trees are often ornamental. Cones are attractive to many birds.

An excellent specimen for central statement pieces in beds, flanking windows and entryways, windbreaks and privacy screens.
